IACBOX Modules

Pick exactly what you need: the following modules are elegible for seperate licensing along with your IACBOX Full or Lite version

Central Services (FULL & LITE)

This is a simple way to allow **central administration of dislocated IACBOX systems**. This feature gives administrators easy and secure web access to the IACBOX *WebAdmin* **interface.** Administrate remote locations via the *my.iacbox* Partner Portal from anywhere in the world.

HIS Interfaces (FULL)

You already have a **hospital information system** and would like to integrate your WiFi hotspot? The HIS interface will do the trick. It allows automated real-time authentication of patients in hospitals, rehab facilities, etc. using an existing hospital information sysem **including optional accounting**.

Supported hospital information systems:
> Siemens HiMed
> Avaya MedCom

VPN Tunnel (FULL)

Connect **multiple IACBOX systems to a central VPN server** for secure and easy management or maintenance access to your dislocated systems. Secure the access via **Batch Access API** for backup or statistics downloads, or access to unencrypted (Radius, ...) backends by VPN tunneling. Supported VPN Servers: Open-VPN

Application Control PRO (FULL)

Use the optional module **IACBOX** *Application Control PRO* to set rules for specific applications or protocols you want to allow completely, only partially or not at all. One key advantage of the PRO version is insight: Real data presented in meaningful diagrams allow **detailed monitoring**. Another strong point of the PRO version is the **individual profiles** function for up to 1,000 bandwidth groups. This allows separate policies for any number of user categories.

Privacy Toolkit (FULL & LITE)

> Dynamically generated **data processing register**, customized according to individual authentication methods and backend integration, with options to fill in individual data processing information
> Privacy friendly default settings (**privacy by default**)
> A set of relevant text templates: GDPR full text, data processing agreement, ...
> Confidentiality agreement for admin/staff
> Data access log
> **Privacy settings checkup**

PMS Interface (FULL)

IACBOX interfaces with the most important **hotel information systems** and lots of other external datasources.
