IACBOX Interfaces

IACBOX provides interfaces to numerous hospitality systems (PMS) and lots of other external datasources.

The **IACBOX Front Office (PMS) Interface** allows guests to choose from predefined Internet packages and book their Internet usage automatically to their room bill. In addition free Internet access is of course also possible.

The **External Authentication** allows to authenticate **guests**, **employees** and **WebAdmin users** against different back ends and datasources.

PMS Interfaces

‣ Amadeus Hotel Front Office (Hogatex)
‣ apaleo
‣ ASA HOTEL
‣ Brilliant Hotelsoftware
