

IACBOX Software Maintenance

Your team of experts for security, comfort and functionality

Security

What do Meltdown, Spectre and the GDPR have in common? The more digital and automated our communication becomes, the more we have to arm against cybercrime and tighten some rules. With regular online updates and a proactive protection approach, our **team of experts** at Asteas keeps a watch on potential risks or loopholes as well as overall security of your system – and your hands free for core business.

Comfort

The more digital our world becomes, the higher the expectations of clients, guests, co-workers or staff. Your software developers at Asteas take care of optimization and new features to ensure that your system offers utmost comfort and is state-of-the-art. Reliably and without waiting for request – so to keep your head free for your actual work.

Flexibility

Who knows what exactly the future may hold? What if you have to add capacity, renovate, expand your branch network, receive more guests, or hire new staff? With active Software Maintenance at Asteas, you are always able to upgrade your license for more users or to add new modules. Fast, easy and fairly calculated – without any worries.

Software Maintenance includes the following services:

- > Software updates
 - > New features
 - > Bugfixes
 - > Security updates (for Linux operating system)
 - > TLS/SSL certificate updates for Surf LAN
