

Information for integration partners: ReviewPro

IACBOX is a complete **software solution for guest WiFi / Internet hotspot** consisting of a captive portal, the required operating system as well as the actual application including all network services required for Internet access. More information on www.iacbox.com.

It is widely spread among the hospitality industry (more than 6000 systems in 45 different countries) and offers various interfaces for connecting customer portals, databases with user data, payment and messaging services as well as PMS / hotel software.

The ReviewPro interface is an additional purchase argument for:

- Customers already operating IACBOX
- Customers who want to integrate in-stay reviews to their WiFi hotspot

With the customizable IACBOX redirect feature for ReviewPro, the customer has options to:

- Select a **freely definable time interval** when the guest is taken offline.
- Redirect the guest to a **review page with an individually designed questionnaire**.
- Take the guest **seamlessly online** again.
- **No** need to sign in again afterwards.

IACBOX Full version is required. The Full version includes the redirect feature **without any additional cost**. Upgrades from Lite to Full version can easily be reordered.

If the customer has no IACBOX license yet, requests can be easily placed at sales@iacbox.com. If a reseller is associated to the license, the request will be forwarded. For any other information feel free to contact the sales team via the above email address.
