

## IACBOX & WiFi4EU

WiFi4EU promotes the installation of public WiFi networks throughout the EU. Municipalities and public bodies can apply for funding; the grants of € 15,000 are awarded and used to finance installation. All the information on the program can be found [here](#). Companies performing this work are referred to as WiFi installation companies. As an IACBOX partner, you already have ideal prerequisites for WiFi4EU projects: the IACBOX meets all captive portal requirements. Astreas Technologies GmbH is also registered as manufacturer for the project.

Things to note:

- at least 50 simultaneous users / devices
- the domain name should refer to the website where the login page is located
- the word **WiFi4EU** must appear in the SSID

- **free login** (one-click-connect), no advertisements, no personal data
- but: data can be processed within the scope of the GDPR for statistical or analytical purposes in order to promote, monitor or improve the network (we recommend the Privacy Toolkit module)
- running time: at least 3 years
- bandwidth management (**non-discriminatory**, no restrictions or interference and independent of sender and receiver, the content retrieved or distributed or the terminal device used)
- **WiFi4EU logo** on the login page
