SCALABLE  
POWERFUL  
FUNCTIONAL  
on-board WiFi  
with IACBOX

## Your on-board WiFi

has to work reliably for all passengers and the crew, near the shore, on the high seas, on a river, lake or in the port?

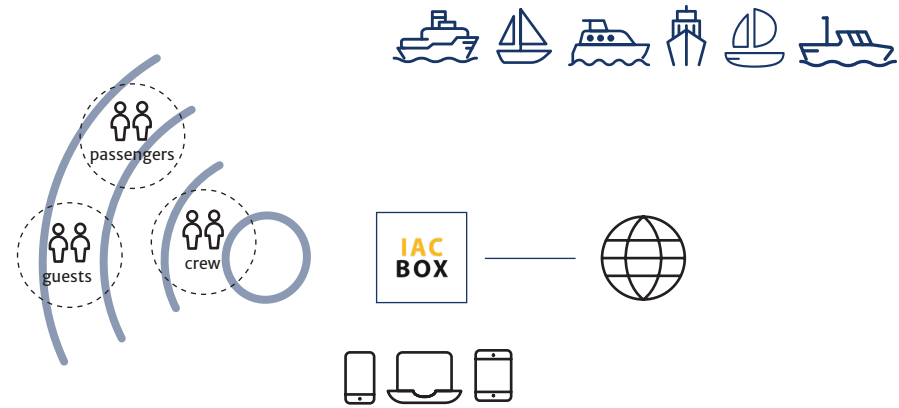

## You need

a scalable on-board system with dynamic bandwidth management, controlled data volumes, independent of hardware brand or cloud.

## The IACBOX offers

### OPTIMIZATION

with smart bandwidth management, traffic shaping options, time and volume-related settings, and all of this completely hardware agnostic.

## Recommended package

FULL license according to number of passengers / crew  
Central Services (for remote admin access)  
Privacy Toolkit (for full compliance with data protection)  
Application Control (for more control)

- Flexible: Purchase hardware from us or your preferred supplier
- Future-proof: Continuous updates and upgrades
- Independent: Compatible with WiFi hardware from all manufacturers
- Legally secure: Made in the EU, operated locally
